

BECOME A ROAMER

ADVENTURE WITH RVs OF AMERICA!

Tech-line Access

The Tech-line allows you to call and text our ROAMER Support Team for answers to quick questions, troubleshooting and scheduling your trailer for upgrades or repairs. The tech-line saves you time and frustration

Mods & Upgrades

Motivated by our belief that anything can be improved, we make great things even better. We upgrade electrical components, improve solar systems, swap water heaters, and more. Talk to a Sales Coach about the possibilities for your trailer!

Roamer Adventures

We aren't interested in a transaction, we want to build relationships. We host several adventures throughout the year that include excursions, off-roading, remote camping spots, and classes on important topics like Solar Systems and Towing.

Free Walkthrough

Our ROAMERs leave feeling confident! Upon delivery, our Team members spend the time that it takes for you to become comfortable with your trailer and its components.

Free Quality Inspection

Nothing in this world is perfect. Unfortunately, this includes RVs. ROA Off-Road takes the time to perform an inspection on each trailer that leaves our shop. The best part is that it's completely free!
